## ***City, Culture and Society***

The 21st century has been dubbed the century of cities – sustainable cities, compact cities, post-modern cities, mega-cities, and more. CCS focuses on urban governance, under the banner of cultural creativity and social inclusion. Its primary goal is to promote pioneering research on cities and to foster the sort of urban administration that has the vision and authority to reinvent cities adapted to the challenges. The journal aims to stimulate a new interdisciplinary paradigm that embraces multiple perspectives and applies this paradigm to the urban imperative that defines this century.

Topics of special interest to CCS include urban economics, cultural creation, social inclusion, social sustainability, cultural technology, urban governance, sustainable cities, creative cities. As a peer-reviewed international journal, CCS welcomes contributions from disciplines including but not limited to economics, business, planning, political science, statistics, geography, sociology, cultural studies, population studies and public administration.
