

First Language Acquisition and its Disorders in Japanese:
An Integrated Approach through Minimalism and
Connectionism

In Partial Fulfilment
of the Requirements for the Degree of
Master of Arts

Graduate School of Literature and Human Sciences
Department of Language and Culture

Osaka City University

by

Kodai Okazaki

Contents

Abstract	1
1. Introduction	2
2. Toward Minimalism	4
2.1. Controversies over Innatism vs Behaviorism in First Language Acquisition	4
2.2. Derivations and Operations in the Computational System of Human Language	6
3. Previous Studies of First Language Acquisition in Minimalism	9
3.1. Innate Hierarchical Structures Generated by Merge	9
3.2. Feature Specifications	11
3.2.1. Types of Features in Minimalism	11
3.2.2. The Backgrounds of Feature Specifications and Their Mechanisms	12
3.2.3. Case Feature Specifications in Japanese	18
3.2.3.1. Controversies over the Existence of Φ -Features in Japanese	18
3.2.3.2. The Mechanisms between Labeling and Case Valuation	23
3.3. Summary and Conclusion of Chapter 3	25
4. Acquisition of AC/AS Sentences by the Japanese Children with TLD and SLI	28
4.1. Previous Studies about Productions of AC / AS Sentences by Children with TLD	28
4.2. Children with SLI	31
4.3. Productions of AC / AS Sentences by Children with SLI and TLD	32
4.4. Case Feature Specifications / Preservation in Acquisition of AS Sentences	35
4.5. Summary of Chapter 4 and Hypotheses	37
5. Language Acquisition Models in Japanese: Neuroscience Perspectives	39
5.1. Cognitive Systems in the MP	39
5.2. The Two Interfaces	40
5.3. Brain and Language	41
5.4. Toward Connectionism	42
5.5. Simple Recurrent Network: Elman's Network	42

5.6. Issues over Biological Plausibility	43
5.7. A Practical Approach to Integration of Minimalism and Connectionism	44
5.8. The Network of L. F3op / F3t and L. SMG	45
5.8.1. Function I and Hypothetical Network Models	46
5.8.2. Modularization and Innateness of Language	50
5.8.3. Sentence Processing for Productions	51
5.9. Sentence Completion Task	53
5.10. A Language Acquisition Model for Understanding Children with SLI	55
5.10.1. Function II of the Network of L. F3op / F3t and L. SMG	56
5.10.2. Difficulty of a Feature Preservation in AS Sentences for Children with SLI	57
5.11. Summary of Chapter 5	61
6. Conclusion	63
References	66
Appendix 1	72
Appendix 2	75
